OTTERPOOL PARK

COUNTRYSIDE · CONNECTED · CREATIVE

A progressive approach to travel

Our vision is for sustainable, active travel so that people don't need to travel long-distances and are less reliant on private vehicles.

We want to enable people to change their travel habits for more sustainable ones, for example swapping your car journey to the shop for jumping on your bike.

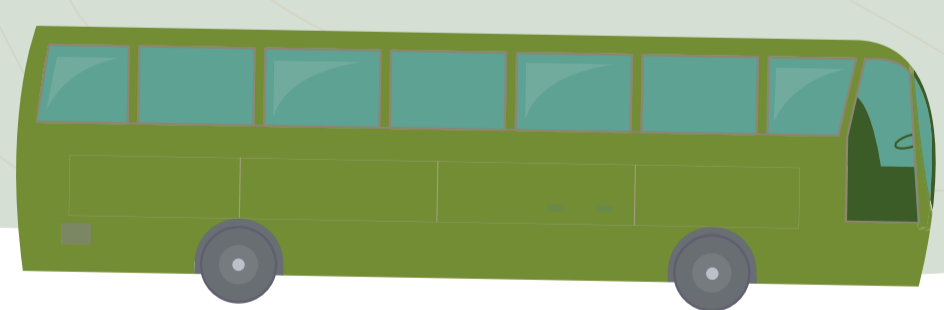

Our Transport Strategy sets out our proposed improvements and services:

- Providing walkable neighbourhoods
- Making it easy to get to the high street, rail station, workplaces, local centres and schools from residential areas by walking, cycling and bus
- Walking, cycling and bridleways connecting into surrounding countryside and communities
- High-quality public transport to and from Otterpool Park
- Minimising and managing traffic on existing road network
- Providing appropriate levels of car and bike parking
- Encouraging sustainable travel
- Providing for future needs – e.g. electric vehicle facilities, and flexibility to adapt to future innovation
- Provide on-site facilities (shops, healthcare), reducing the need to travel
- Providing mobility services that accommodate the needs of everyone at Otterpool Park.

30km
of cycleways

Most homes 400m from a
bus stop

All homes within
800m of a
primary
school

Our Future Mobility plan uses insight from an online survey to understand people's travel needs and design the infrastructure to these needs.
